ACTION: Final rule.

SUMMARY: The Commission, at the request of Dana J. Puopolo, allots Channel 242C1 to Ingalls, Kansas, as the community's second local aural transmission service. See 61 FR 2469, January 26, 1996. Channel 242C1 can be allotted to Ingalls, Kansas, in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for Channel 242C1 at Ingalls are 37-49-48 and 100-27-06. With this action, this proceeding is terminated.

DATES: Effective June 21, 1996. The window period for filing applications will open on June 21, 1996, and close on July 22, 1996.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418-2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 95-180, adopted April 24, 1996, and released May 7, 1996. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Part 73 of title 47 of the Code of Federal Regulations is amended as follows:

PART 73—[AMENDED]

1. The authority citation for part 73 continues to read as follows:

Authority: Secs. 303, 48 Stat., as amended. 1082; 47 U.S.C. 154, as amended.

§73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Kansas, is amended by adding Channel 242C1 at Ingalls.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 195

Petroleum Products and Low-Stress Pipelines

AGENCY: Research and Special Programs Administration, (RSPA), DOT.

ACTION: Interpretation and partial stay of enforcement of regulation.

SUMMARY: This document interprets the definition of "petroleum product" under RSPA's safety regulations for

hazardous liquid 1 pipelines. The definition has been applied to petrochemical products that the regulations were not intended to cover. The interpretation should reduce confusion in deciding which low-stress pipelines ² are subject to the regulations.

In addition, this document stays enforcement of the regulations against low-stress pipelines regulated by the U.S. Coast Guard, and against certain short low-stress pipelines that serve plants and transportation terminals. Application of the regulations to these lines would cause undue burdens for industry and government. The stay should ease difficulties in applying the regulations to low-stress pipelines.

EFFECTIVE DATE: May 14, 1996.

FOR FURTHER INFORMATION CONTACT: L. M. Furrow, (202) 366-4559.

SUPPLEMENTARY INFORMATION:

Background

In response to a Congressional directive,3 RSPA extended its hazardous liquid pipeline safety regulations (49 CFR Part 195) to cover certain low-stress pipelines other than rural gathering lines and gravity-powered lines (59 FR 35465; July 12, 1994). That rulemaking action affected low-stress pipelines that transport highly volatile liquids, lowstress pipelines that are located onshore in non-rural areas, and low-stress pipelines that are located offshore or in waterways that are navigable in fact and currently used for commercial navigation (§ 195.1(b)(3)).

Transfer lines comprised the largest proportion of low-stress pipelines brought under Part 195 (about twothirds of the pipelines and one-third of the mileage). The remainder included trunk lines and non-rural gathering lines. Transfer lines are used to transport hazardous liquid locally between facilities such as transportation terminals, manufacturing plants, petrochemical plants, and oil refineries, or to connect these facilities to associated storage or long-distance pipeline transportation. Because the rulemaking action affected the current operating practices of many companies unfamiliar with Part 195, we allowed operators to delay compliance of

^{1 &}quot;Hazardous liquid" means petroleum, petroleum products, or anhydrous ammonia.

²Low-stress pipeline means a hazardous liquid pipeline that is operated in its entirety at a stress level of 20 percent or less of the specified minimum yield strength of the line pipe. (§ 195.2)

³ The Secretary of Transportation may not provide an exception from regulation for a hazardous liquid pipeline facility only because the facility operates at low internal stress. (49 U.S.C. § 60102(k))
